## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 12-19 allowed.
2. Claims 2-11 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 1 rejected under 35 U.S.C. 102(e) as being anticipated by Lim et al. (6,448,579)

Lim et al. disclose a thin film transistor array substrate for liquid crystal display and a method for fabricating the same where in Fig. 9, two storage capacitors "M" and "N" are disposed between gate line 206 and capacitor electrode 216 formed above the gate line 206 where the gate line 206 is connected via contact holes 209 and 211 and connecting electrode 219 passing through storage capacitors "M" and "N" to the capacitor electrode 216

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C.

102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the

Art Unit: 2826

inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.
